

# Password Safe ECM Plugin 24.1.2 Release Notes

May 7, 2024

## Requirements

• BeyondTrust ECM v1.6Ms.0+

#### **New Features and Enhancements**

This is a maintenance release and does not include any new features or enhancements.

### **Issues Resolved**

- Resolved an issue in which recently used external endpoints were not being returned.
- Resolved an issue in which available credentials were not being returned when using U-Series Appliance deployed ECMs.

#### **Notes**

- This maintenance release replaces any usage of v24.1.1.
- Supports upgrades from any prior release.
- This release will be included as part of the U-Series Appliance image for the BeyondInsight and Password Safe 24.1.1
  maintenance release.
