

# PowerBroker for Windows 7.8.9.7 Release Notes

December 23, 2021

## IMPORTANT!

An issue has been identified with in-place upgrades from 7.8.8.21 clients to 7.8.9.7. To proceed with upgrading, first uninstall 7.8.8.21, and then install 7.8.9.7. This issue will be resolved in a future release planned for early Q1 2022. For more information about PowerBroker for Windows 7.8.8.21, please see [PowerBroker for Windows 7.8.8.21 Release Notes](https://www.beyondtrust.com/docs/release-notes/powerbroker-windows/powerbroker-windows-7-8-8-21.htm) at <https://www.beyondtrust.com/docs/release-notes/powerbroker-windows/powerbroker-windows-7-8-8-21.htm>.

## IMPORTANT!

Please upgrade directly to version 7.9.0.7, as some customers have reported that a few 32-bit apps (configured in compatibility mode) crash on Windows 10 endpoints with this release. These issues have been resolved in 7.9.0.7.

### New Features and Enhancements:

- Microsoft Windows 11 2021H2 is now supported.

**Note:** Some apps in Windows 11, for example, Notepad, MS Paint, Photos, Calculator, etc., will require a new rule to be created, as their paths have changed in Windows 11. For more information, please see [Windows 11: Notepad and MS Paint are getting new Fluent header](https://www.windowslatest.com/2021/06/25/windows-11-notepad-and-ms-paint-are-getting-new-fluent-header) at <https://www.windowslatest.com/2021/06/25/windows-11-notepad-and-ms-paint-are-getting-new-fluent-header>.

### Issues Resolved:

- Resolved issues with Windows 11 compatibility.
