April 16, 2024

Requirements:

- Requires Base 7.1.0.
- Requires ECM 1.6.1.
- Requires Integration Client 1.7.5.

> ℹ️ *For a list of supported platforms for the latest version of Privileged Remote Access, see* [Supported Platforms](#)*.*
>
> *Supported Platforms for previous versions of Privileged Remote Access can be found in the* [Privileged Remote Access Documentation Archive](#)*.*

New Features and Enhancements:

- This is a maintenance release. There are no new features.

Issues Resolved:

- Vendor group items count does not match with the vendor groups in the vendor group table.
- Group policy count item does not show correctly after changing the rank order.
- Error when trying to remove a traffic node from a cluster.
- Local accounts not showing after performing Jump Client discovery.
- Syslog does not record events after upgrade.
- Request to ignore certificate validation not honored when using BYOT RDP feature.
- Delayed session start and intermittent disconnect after upgrade.
- Jump Clients might give error message **Could not locate existing support session** after prompting to join an existing session.
- Access Console invitation to external users does not accept some email address domain suffixes.
- Intermittent and customer-specific Web Console crashes.
- Web Access Console error, **The server connection closed unexpectedly**.
- Incorrect scrolling when spanning a session across multiple monitors.
- Alt+Space special keys not working when screen sharing with the Access Console on Windows.
- Special keys not working between multiple sessions tab in screen sharing with the Access Console on Windows.
- Error in Mac uninstall logic prevents full endpoint cleanup.
- Session termination behavior not working as expected.

Notes:

- This version of Privileged Remote Access has been certified for physical BeyondTrust Appliances, virtual BeyondTrust Appliances, and cloud deployment models.
- Verified for GA.
- Supports upgrades from 22.4.1 PA+.
- Supports ECM Protocol 1.6.
- Includes VSC 1.2.6.1.
