Check out the schedule below to find the course and time that works best for you, and select the "Level Up + Certification Training" option at checkout in order to secure your seat.

Note: seats are limited.

Remote Support for Administrators

This course is designed for system/network administrators who want to learn how to configure and extend Remote Support for their unique environment. During the course, administrators will learn how to efficiently administer and configure Remote Support on an ongoing basis focusing on these learning objectives: Setting Remote Support up for Success, Establishing Security Policies, Mastering Support Options, Customizing the Customer Experience, and Optimizing Session Data Reporting and Archival. This course includes a hands-on lab with exercises for students to practice what they learn. This course is offered as a virtual course delivered over 4 half days. Students who successfully complete this course are eligible to take the associated BeyondTrust Certification exam.

June 8-11: 8am – 12pm BST | June 14-17: 8am – 12pm EST

Privileged Remote Access for Administrators

This course is designed for the security professional tasked with administering, monitoring and reporting using Privileged Remote Access. During the course administrators learn how to efficiently configure Privileged Remote Access in the network and manage secure access to critical systems utilizing our patented Jump Technology and other access features. This course includes a hands-on lab with exercises for students to practice what they learn. This course is offered as a virtual course delivered over three days via four-hour increments. Students who successfully complete this course are eligible to take the associated BeyondTrust Certification exam.

June 15-17: 12pm – 4pm EST
