

# BeyondTrust BeyondInsight v21.1

Feature Release – April 8, 2021

**BeyondInsight** is BeyondTrust's platform for centralized management, reporting, and threat analytics for Privilege Access Management (PAM). It delivers unmatched visibility and control over privileged access activity, simplifies deployment, automates tasks, improves security, and reduces privilege-related risks.

See the release notes for details.

## New Feature Highlights

---

### **Global Policy for Privilege Management for Windows & Mac (PMWM)**

In BeyondInsight, customers use Smart Rules to dynamically group assets (agents) and to deliver policy to them. Because assets can belong to multiple Smart Rules, a policy assignment conflict can occur.

With Global Policy enabled, BeyondInsight serves all policies across all applicable Smart Rules. This feature allows the PMWM agent to know the order in which to process all the policies assigned to it, regardless of the number of Smart Rules the asset belongs to. This feature introduces new flexibility to process all policies, while removing potential policy assignment conflicts.

### **Policy Auditing for Privilege Management for Windows & Mac**

With this release, the PMWM standalone policy editor will now log what policy was edited and by whom. These audit events are captured and displayed by BeyondInsight under the existing User Audits grid.

### **Optimized Analytics & Reporting (A&R) Home Screen**

As part of our initiative to continually improve the user experience, we have optimized the display of reports in “Analytics and Reporting.” We have removed extra clicks and screens and now allow the user to go directly to the report browser. This new navigation path saves time and enhances productivity.

## About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.

Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions can easily deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at [www.beyondtrust.com](http://www.beyondtrust.com).
