

BeyondTrust BeyondInsight 22.1

Feature Release – January 31, 2022

BeyondInsight is BeyondTrust's platform for centralized management, reporting, and threat analytics for Privilege Access Management (PAM). It delivers unmatched visibility and control over privileged access activity, simplifies deployment, automates tasks, improves security, and reduces privilege-related risks.

See the release notes for details.

New Feature Highlights

Support for Web Policy Editor (WPE) and Azure AD filtering for Privilege Management for Windows & Mac (PMWM)*

BeyondInsight enables admins to install Web Policy Editor and includes Azure AD filtering for PMWM to manage policies through the BeyondInsight Platform.

With Web Policy Editor admins can now directly create and edit policy in the BeyondInsight management console for Privilege Management for Windows & Mac, providing a vastly improved user experience and workflow. Reducing overhead with Azure AD integration, admins can use Azure AD user groups as policy targets.

Policy Locking for Privilege Management for Windows & Mac (PMWM)*

BeyondInsight now supports *policy locking*. Policy locking protects a policy that is actively being edited from being simultaneously changed. Simplifying administration, policy conflicts are eliminated by preventing concurrent modifications.

* Requires the WPE v22.1 installer which will be made available later this year.

Public API - User Audit Events

BeyondInsight provides extensive user audit data to ensure security compliance. This data is now exposed via the public API, allowing admins to programmatically retrieve user audit events.

Improved BeyondInsight Admin Workflow

BeyondInsight has updated the admin console and improved workflows around the scan wizard and user management configuration. These updates streamline the configuration of discovery scans and user management.

About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.

Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions can easily deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at www.beyondtrust.com.
