

# BeyondInsight Version 6.10

New and Updated Features – February 11, 2020

## Product Description

BeyondInsight is the industry's most innovative, comprehensive privileged access management platform that maximizes visibility, simplifies deployment, automates tasks, improves security and reduces privilege-related risks. Gain a comprehensive view of the vulnerabilities that provide doors into an environment, as well as the privileges that present corridors to sensitive assets.

The security team benefits from being able to correlate vulnerability information with user activity, while IT gains a clearer view of how privilege policies impact overall security. This fusion of asset and user intelligence enables IT and Security to collectively reduce risk across complex environments.

## New Feature Highlights

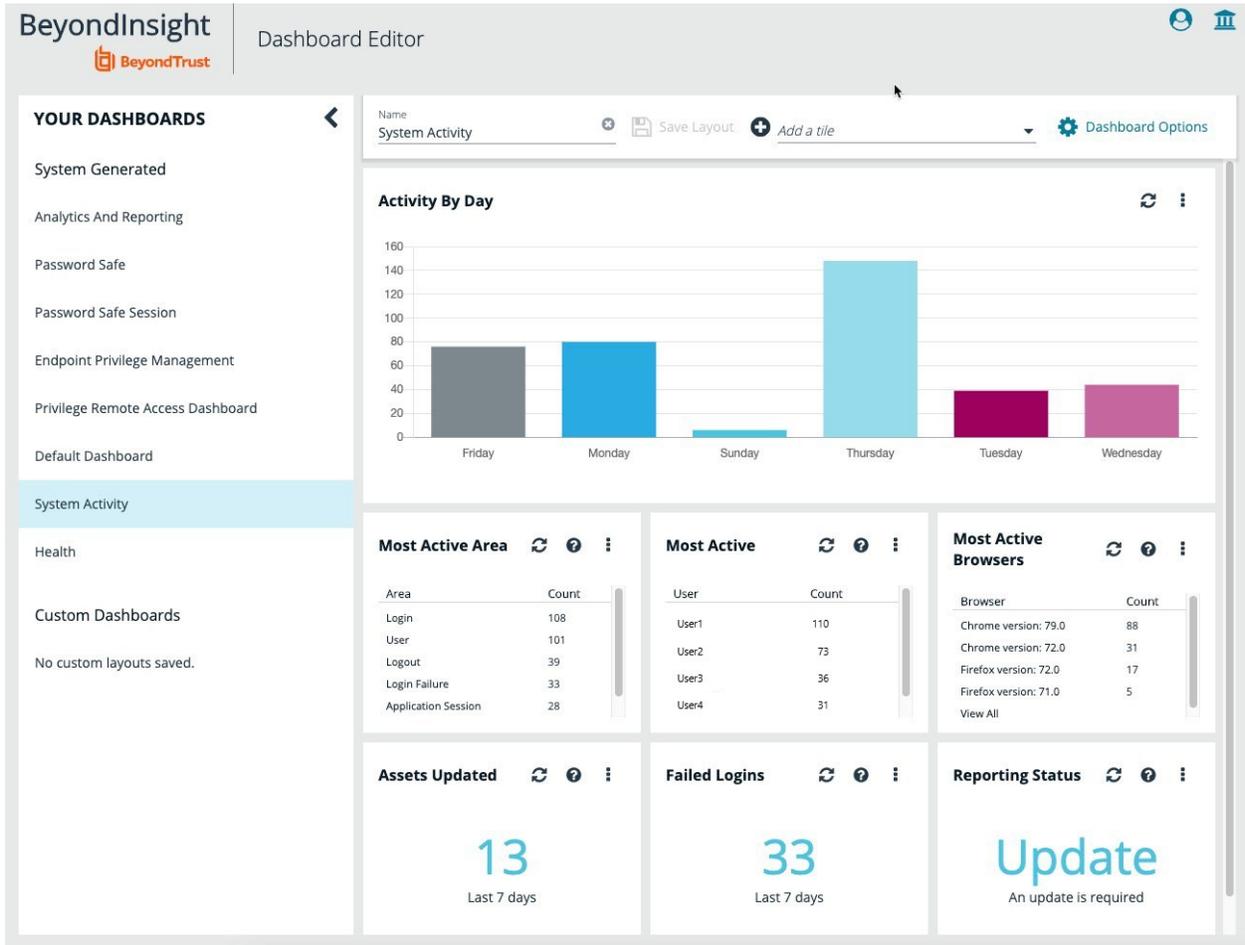

### Dynamic Dashboards (Preview Only)

---

Customizable dashboards with information at a glance provide efficiency, productivity and customizability. These attributes allow a BeyondInsight administrator to create their own dynamic dashboards that include pertinent information to their organization. They can monitor the solution from a single dashboard and can dive into more details with a simple click of the mouse.

No longer does a user need to navigate to multiple areas of the solution to get feedback nor do they need to generate reports in order to get system status.

*“Preview” means this feature is not generally available, yet – it will be live later this year. For now, our customers receive a preview of what’s to come.*

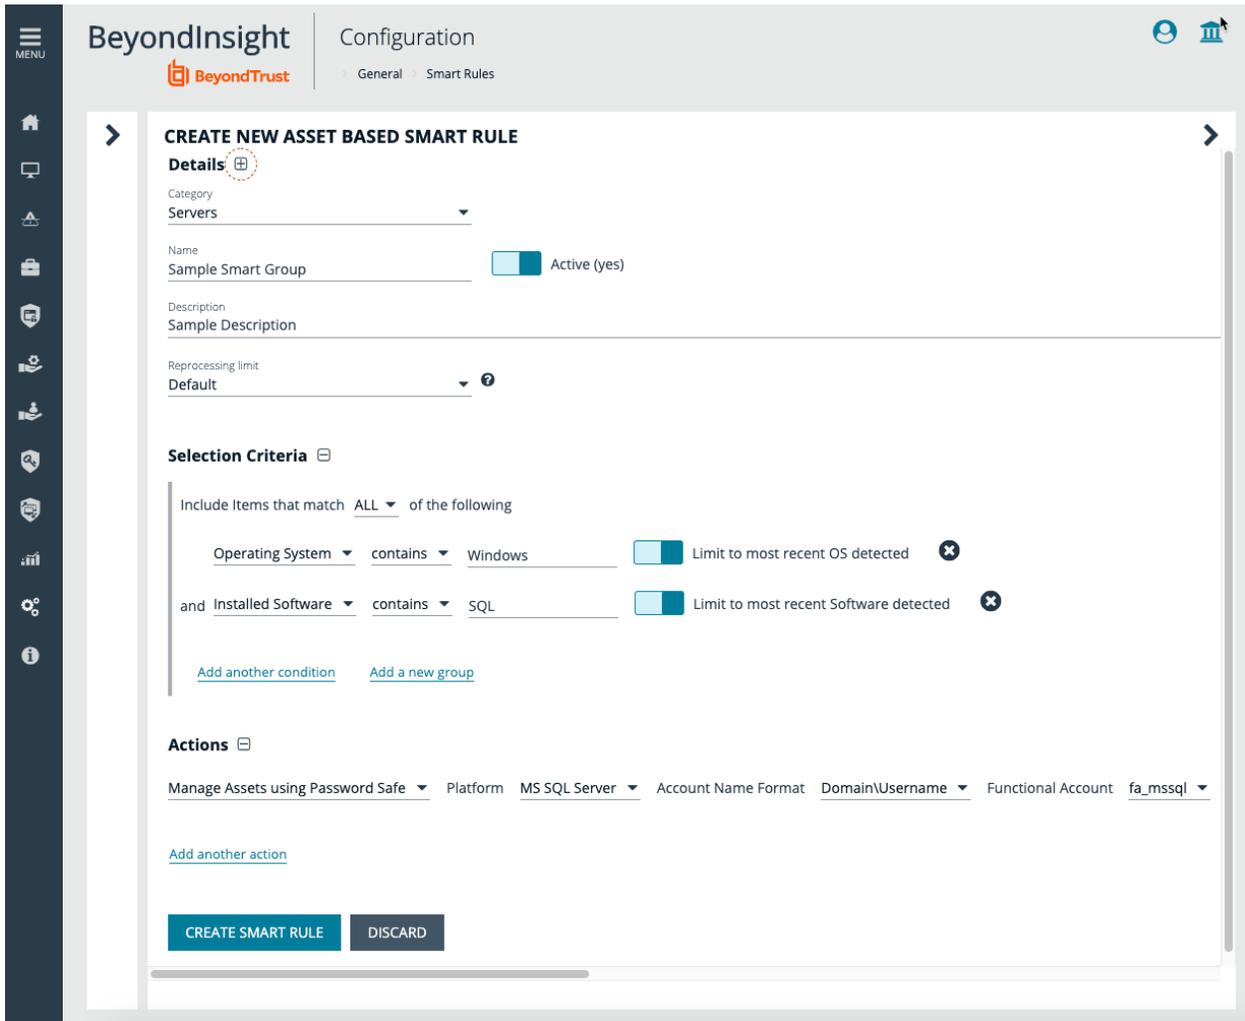

## HTML5 Administration User Interface

As BeyondTrust continues to innovate and move away from the Adobe Flash-based administration user interface, more HTML5 is now available including:

- Main Screens
  - Assets Grid
- Configuration Screens
  - Smart Rules
  - Users and Groups (User Management)
  - Scan Grid
    - Active and completed scans
  - Organizations & Workgroups

- Active Directory Queries
- Directory Credentials
- Multi-Factor Authentication (RADIUS, Smart Card)

**BeyondInsight** Configuration

General Smart Rules

### CREATE NEW ASSET BASED SMART RULE

**Details**

Category: Servers

Name: Sample Smart Group  Active (yes)

Description: Sample Description

Reprocessing limit: Default

**Selection Criteria**

Include Items that match ALL of the following

- Operating System contains Windows  Limit to most recent OS detected
- and Installed Software contains SQL  Limit to most recent Software detected

[Add another condition](#) [Add a new group](#)

**Actions**

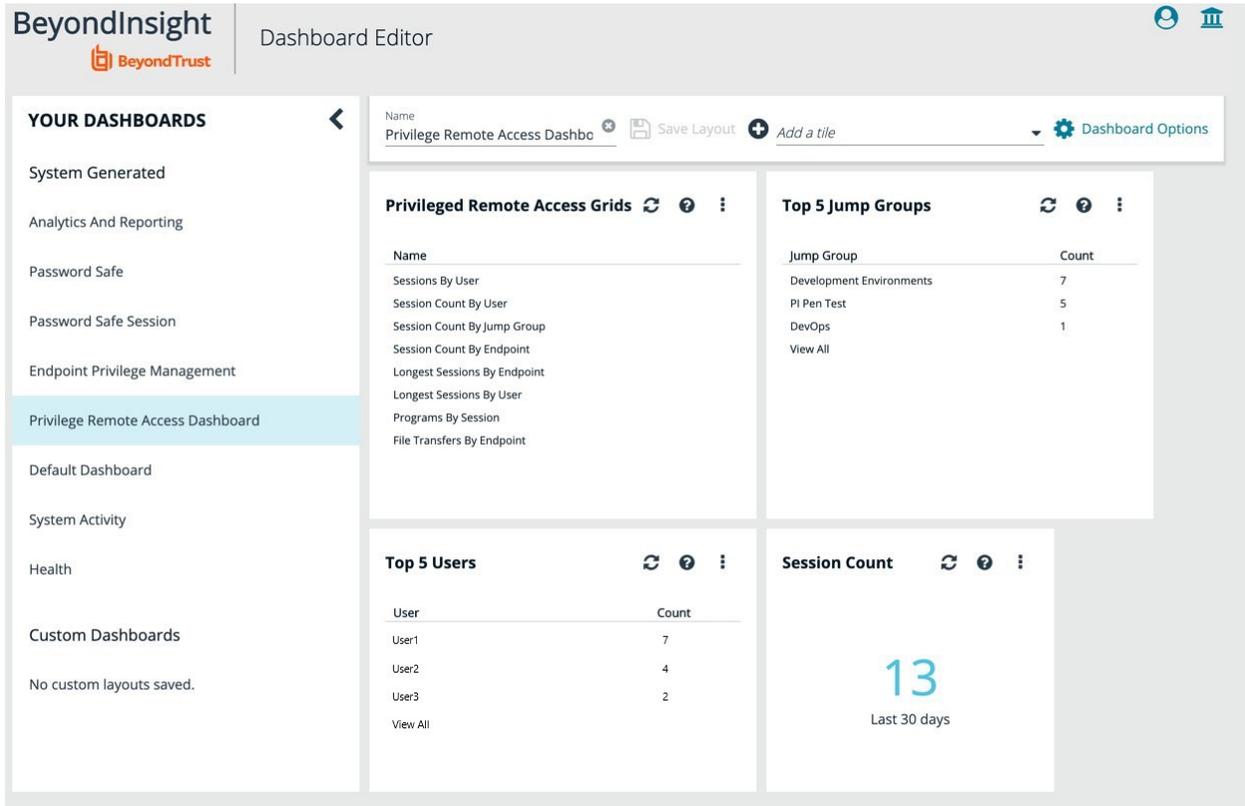

Manage Assets using Password Safe Platform MS SQL Server Account Name Format Domain\Username Functional Account fa\_mssql

[Add another action](#)

**CREATE SMART RULE** **DISCARD**

## BeyondTrust Privileged Remote Access Integration

BeyondTrust's Privileged Remote Access (PRA) is now integrated with BeyondInsight. This integration allows administrators to leverage the platform for session details and reports of PRA. Including a new Dashboard view for PRA sessions, which users can access in the BeyondInsight interface. PRA users who currently utilize reporting functionality of /login can continue to view session details, reports, and session recordings in the /login interface to pulls session details and recordings.

**Privileged Remote Access Grids**

Name
Sessions By User
Session Count By User
Session Count By Jump Group
Session Count By Endpoint
Longest Sessions By Endpoint
Longest Sessions By User
Programs By Session
File Transfers By Endpoint

**Top 5 Jump Groups**

## API Update

Each release of BeyondInsight continues to build on the open API's available when automating or integrating with other parts of your infrastructure. Version 6.10 adds new APIs for Address Group Management. These new APIs allow for programmatic management of address groups to further facilitate scan target automation.

## Performance Enhancement

We've also taken the opportunity to revisit the underlying code to introduce performance enhancements that you'll see across the product.

## About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance. Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions are easy to deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at [www.beyondtrust.com](http://www.beyondtrust.com).
