

Privilege Management for Unix and Linux 22.2

Supported Platforms

This is a list of operating systems on which the current version of Privilege Management for Unix and Linux is maintained and receives full support. These Privilege Management for Unix and Linux versions will be updated if necessary to fix problems with functionality and enhancements.

The following lists identify which releases of Privilege Management for Unix and Linux are available on which UNIX and Linux operating systems. File names are structured as **<Release identifier>.tar.Z** where the **<Release identifier>** is **pmul_<OS flavor>-<release number>**.

 **Note:** We recommend before any clients are upgraded to the latest release of Privilege Management for Unix and Linux, the license, policy, and log servers be upgraded to the latest release.
