

Privilege Management for Windows & Mac Cloud

21.2

New and Updated Features – March 23, 2021

BeyondTrust Privilege Management for Windows & Mac (PMWM) is a preventative endpoint security solution that removes excessive admin rights, applies modern application control, enables passwordless administration, and gives users just enough privileges to do their jobs and be productive. Available on-premises or via SaaS, the solution blocks malware and ransomware and protects against both external and internal threats. Utilizing QuickStart policies, organizations receive rapid time-to-value whether deploying the solution on-premises or via SaaS.

Privilege Management for Windows & Mac 21.2 improves user experience and provides further feature enhancements.

Please see the [release notes](#) for additional details on these important enhancements.

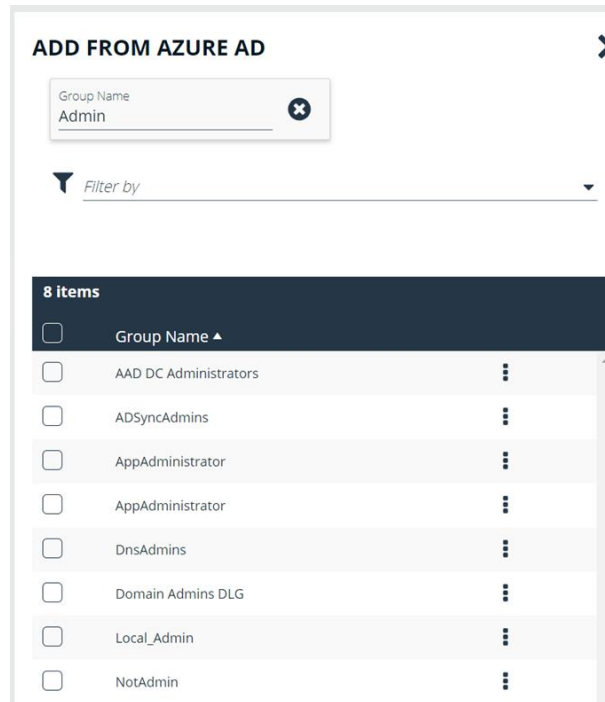

New Feature Highlights – Privilege Management for Windows & Mac Cloud

Web Policy Editor Updates

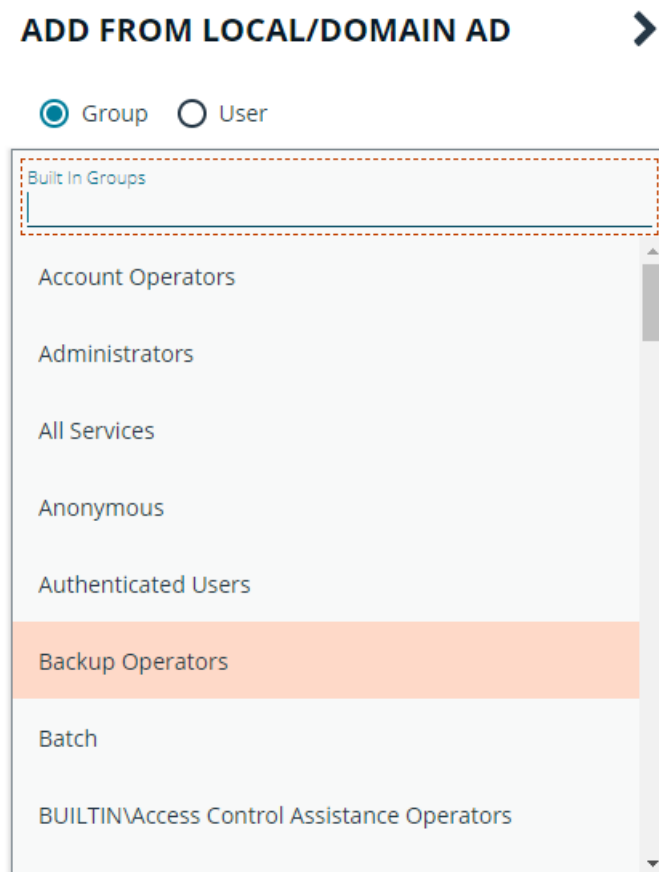

PM Cloud 21.1 introduced policy editing directly into the management console, allowing customers to create and edit policies directly in the platform. This provides a vastly improved user experience, making policy management quicker, easier, and more intuitive.

New enhancements in 21.2:

- **Mac Account Filters:** Expanded our Web Policy Editor capabilities to include the ability to target Mac Workstyles with the account filter directly within the PM Cloud console.
- **Azure AD Account Browsing:** Expanded the Azure AD integration even further with this new ability to easily browse the Azure AD groups and select them for filtering your Windows Workstyles.

- AD Built-in Groups: Expanded the Web Policy Editor capabilities to include the ability to easily select from a list of common groups when using account filters:

About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance. Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions are easy to deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at www.beyondtrust.com.
