

Privilege Management Cloud 22.1

Privilege Management for Windows & Mac 22.1

New and Updated Features – February 22, 2022

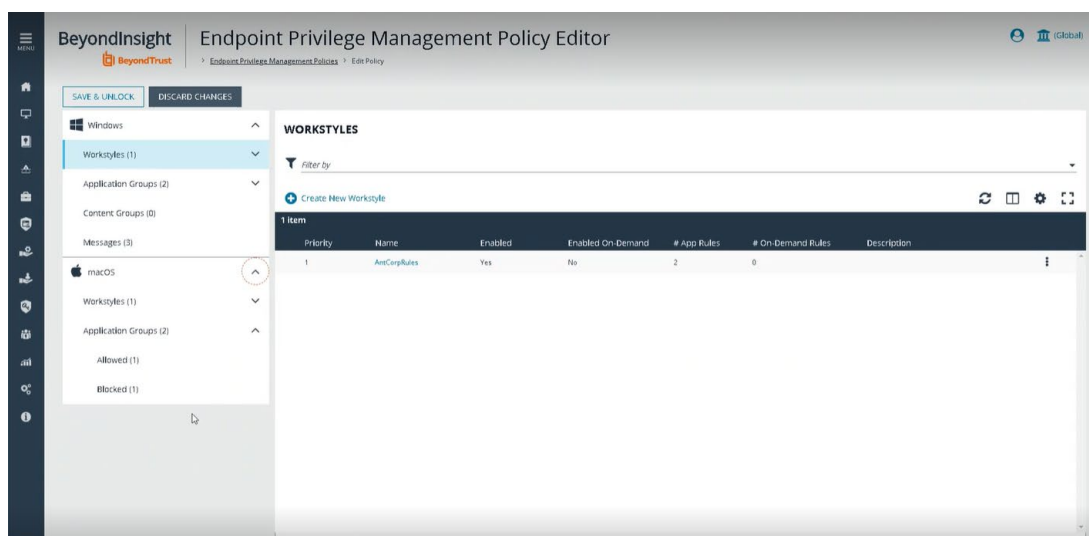

BeyondTrust Privilege Management for Windows & Mac pairs powerful least privilege management and pragmatic application control capabilities, delivering fast, unmatched preventative endpoint security. Grant the right privilege to the right application – not user – only when needed and create a single audit trail. Prebuilt policy templates stop attacks involving trusted apps, addressing bad scripts and infected email attachments immediately. Application control, allow lists, and exception handling provide granular control over what users can install or run, and what applications can execute. Operationalize quickly with our QuickStart feature and simplified deployment models, for fast time-to-value and streamlined compliance.

Please see the [release notes](#) for additional details on these important enhancements.

New Features and Enhancements

New Policy Editor for BeyondInsight

For customers using BeyondInsight, we have upgraded the interface that matches the Cloud experience with our new Policy Editor. This provides a vastly improved user experience, making policy management faster, easier, and more intuitive.

New Policy Editor in the BeyondInsight Platform

Updated Management API

This release updates the Management API. The Privilege Management Cloud (PM Cloud) Management API serves as a method for customers to interact with PM Cloud in their own custom applications, as a user would through the Portal front-end.

Updates to Policy in this release include:

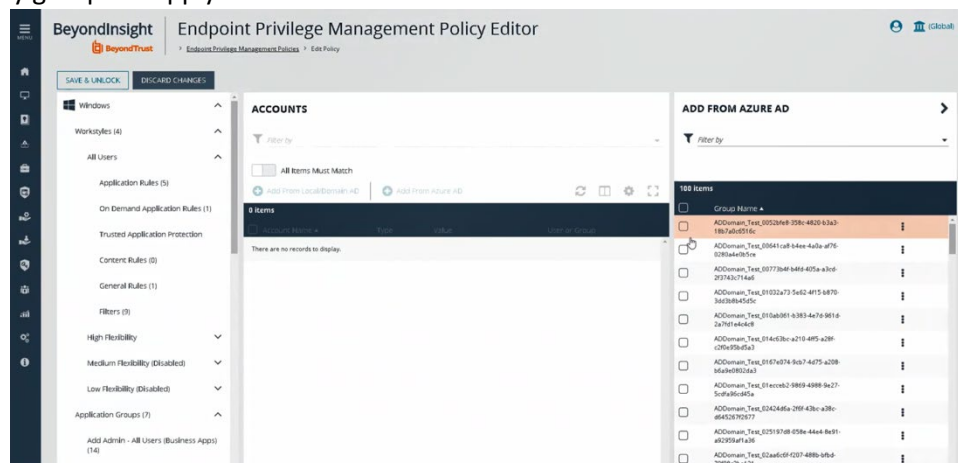

- Retrieve Policy
- Retrieve Policy Detail
- Update Policy Properties
- Assign Policy to Group
- Remove Policy from Group
- Deploy Policy to List of Computers
- Download Policy Revision
- Delete Policy
- Revert and Discard Policy Changes

Updates to Endpoints in this release include:

- Retrieve User List
- Retrieve Role List
- Retrieve User
- Retrieve Role
- Create User
- Update User
- Disable User
- Resend Email Invite

Azure AD Filtering in BeyondInsight

Now Privilege Management for Windows & Mac customers that use BeyondInsight can use Azure Active Directory groups to apply filters and rules.

Azure Active Directory Filtering in BeyondInsight

MFA Suppression

The need for an end user to confirm their identity using an MFA token can now be suppressed for a specified period. This helps with customers who regularly need to perform multiple, repeated elevated actions to avoid what has been described as "token fatigue."

Updates for OpenID Configurator

Users can now:

1. Use the PM Cloud Portal to migrate from Microsoft B2B authentication to OIDC authentication
2. Use the PM Cloud Portal to change their OIDC information, like Client Adapter which often has password expiry rules in play

Other Enhancements

- Removal of Log4j
- Support for OAuth in Privilege Management for Mac
- Allow authorization of Console.app on MacOS
- Link from Client & Adaptor Summary to Computers Grid
- Web Policy Editor:
 - Updated messaging in Web Policy Editor
 - Allow users to search for applications within application groups
 - Allow advanced agent configurations

About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance. Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions are easy to deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at www.beyondtrust.com.
