

Privilege Management SaaS 20.5

New and Updated Features – November 19,2020

BeyondTrust Privilege Management for Windows & Mac is a preventative Endpoint Security solution that removes excessive admin rights, applies modern application control, enables passwordless administration, and gives users just enough privileges to do their jobs and be productive. The solution blocks the majority of malware and ransomware and protects against both external and internal threats. Utilizing QuickStart policies, organizations receive rapid time-to-value whether deploying the solution on-premises or via SaaS.

Privilege Management SaaS (PM SaaS 20.5 helps customers meet compliance and improves user experience.

Please see the [release notes](#) for additional details on these important enhancements.
