

BeyondTrust Cloud Privilege Broker 22.1

Feature Release – February 8, 2022

Cloud Privilege Broker (CPB) is an entitlements, privileges, and permissions management solution that enables customers to visualize and manage cloud access risk in hybrid and multicloud environments from a single interface. Built in the cloud on a modern technology platform, CPB provides continuous discovery, centralized management, and reporting in a single tool that scales with customer needs.

See the release notes for details.

New Feature Highlights

New Recommendation: Review Permissions in MS Azure

With the release of 22.1, Cloud Privilege Broker provides visibility into Azure principals where permissions are not being used. Customers will be able to understand who has access to Azure resources that may no longer be required. This recommendation helps teams implement the principle of least privilege and reduces the risk of a breach, while the guided remediation steps provided by CPB increase productivity.

New Recommendation: Review Permissions in AWS

With the release of 22.1, Cloud Privilege Broker provides visibility into Amazon Web Services (AWS) principals where permissions are not being used. Customers will be able to understand who has access to AWS resources that may no longer be required. This recommendation helps teams implement the principle of least privilege and reduces the risk of a breach, while the guided remediation steps provided by CPB increase productivity.

Recommendations Enhancement: JSON Viewer

With the release of 22.1, teams can use the new JSON viewer to view updated AWS IAM Policies or Azure Custom Role Assignments recommended by Cloud Privilege Broker. The new JSON viewer helps organizations to remediate excessive permissions more efficiently by reducing the number of steps required to apply the policy, reducing the attack surface while increasing the teams' productivity.

About BeyondTrust

BeyondTrust is the worldwide leader in Privileged Access Management (PAM), empowering organizations to secure and manage their entire universe of privileges. Our integrated products and platform offer the industry's most advanced PAM solution, enabling organizations to quickly shrink their attack surface across traditional, cloud, and hybrid environments.

The BeyondTrust Universal Privilege Management approach secures and protects privileges across passwords, endpoints, and access, giving organizations the visibility and control they need to reduce risk, achieve compliance, and boost operational performance.

Our products enable the right level of privileges for just the time needed, creating a frictionless experience for users that enhances productivity.

With a heritage of innovation and a staunch commitment to customers, BeyondTrust solutions can easily deploy, manage, and scale as businesses evolve. We are trusted by 20,000 customers, including 70 percent of the Fortune 500, and a global partner network. Learn more at www.beyondtrust.com.
