

BeyondTrust Privileged Identity 7.1

New and Updated Features – June 24, 2021

BeyondTrust Privileged Identity continuously discovers, tracks, and automatically provides privileged accounts with unique and frequently changing credentials, ensuring that powerful privileged identities are only available to audited users on a temporary, delegated basis.

Feature Highlights

Authorization Process UX Improvements

Authorization workflows for both SSH keys and passwords now follow the same process – improving the consistency in product operation and user experience.

Job Management Updates

Privileged Identity new job delegations are now required for exposed job management in web applications. As part of the update, ALL ACCESS is not required to manage, add, edit, or delete jobs, which allows more granular control for end users.

Web Application/Web Service Additions

We continue to expand the capabilities of the web service and web application, giving more opportunities to leverage the web application to use and manage Privileged Identity as well as automate its operation.

Areas added to the web service and web application in this release include:

- Job Delegation
- Configuring Extension Components
