

# Event Server 4.1.1.0 Release Notes

February 14, 2019

## New Features and Enhancements:

- SQL Server 2017 is now supported.
- The software has been rebranded with the new company logo and colors.

## Issues Resolved:

- Log files are now purged after seven days.
- The log and queue files are no longer removed on upgrade.
- The install path is now correctly honored on upgrade.
- Resolved an issue with the BeyondInsight support package for Analyzer and Event Server.
- The install folder is now removed on uninstall.
- Log settings are no longer overwritten when BeyondInsight is upgraded.

## Notes:

- Requires .NET 4.5.
- Allows for self-signed certificates.
- Available upon request.
