

# BeyondTrust Updater 2.8.x Release Notes

May 16, 2019

## New Features and Enhancements:

- Rebranded the management console for Unix and Linux to BeyondInsight for Unix and Linux.
- A new subscription has been added to allow cumulative releases for BeyondInsight and Password Safe.
- Added a download support package option in BeyondTrust Updater Enterprise.

## Issues Resolved:

- SQLite upgraded within BeyondTrust Updater to version 3.26.0 to resolve a security issue.

## Notes:

- Requires .NET 4.5.
- Allows for self-signed certificates.
- Available through BeyondTrust Updater
