

Updater Version History 2.3.0 to 2.5.1

BeyondTrust Updater 2.5.1 Release Notes

Date of Release: 28 August 2018

Product Name: BeyondTrust Updater

Updated Version: 2.5.1

Superseded Versions: 1.0.0-2.5.0

Table of Contents

1. What's New in This Release
2. Known Issues
3. General Notes
4. Release Availability
5. Issues Resolved

1. What's New in 2.5.1

=====

- Subscription locks will default to 0.0.0.0 if subscription has never been locked by end user to mitigate confusion
- GDPR section, in regard to Analyzer data, will contain updated end user informational text
- Hide the password entered for email as current exists for proxy settings
- Change to wording in activity feed when package subscription is download only

2. Known Issues

=====

- After upgrade you are required to clear the browser cache (restart browser)
- Shortcut to log folder location does not work on all operating systems
- You have to restart client application to reflect changes in the policy settings

3. General Notes

=====

- There are numerous user interface improvements; reviewing the user guide is encouraged.

4. Release Availability

=====

- Pushed to the Appliance on August 28th
