Identity Security Insights 23.08.1 Release Notes

August 29, 2023

New Features and Enhancements:

- The EULA has been updated for new customers.
- Detection reports now provide higher fidelity details and information.
- The Connectors screen UI has been improved.

Issues Resolved:

- Resolved an issue in which the Microsoft Azure Connector script did not display in full.
- Resolved an issue with the Connector date picker for the Last Activity and Last Updated columns incorrectly matching given dates.
- Resolved an issue where creating a new Microsoft Active Directory Connector did not redirect to the Configured page.
- Resolved an issue in which Active Directory Groups displayed twice on the Identity Details > Role page.

Known Issues:

None.

Notes:

None.
