

# Identity Security Insights 24.05 Release Notes

May 7, 2024

## New Features

### Downloadable CSV Files

You can now download your Insights data into a CSV file for offline reporting and analysis using the new **Download** button, located above the grid on the **Identity**, **Account**, **Entitlements**, **Detection**, and **Recommendation** pages.

The screenshot shows the 'Detections' page in the BeyondTrust Identity Security Insights application. The page header includes a navigation menu, the company name 'Company-Tenant', and user options for 'Apps', 'Help', and 'Profile'. The main content area is titled 'Detections' and features a 'Detections Overview' section with a summary of severity levels: 2 Critical, 6 High, 0 Moderate, and 0 Low. Below this is a table with columns for 'Detection Name', 'Severity', 'Entities', and 'Total Count'. The 'Download' button is highlighted with a red box.

Detection Name	Severity ↓ 2	Entities ↓ 1	Total Count
Okta Session Hijacking	Critical	0	0
New Okta IdP Enrolled	Critical	0	0
Suspicious Password Safe Sign-In From Malicious IP	High	0	0
