

Remote Support SIEM Tool Plugin 2.4.1 Release Notes

July 19, 2022

Issues Resolved:

- Addressed an issue in which certain custom template functions were failing due to recent changes in the Handlebars.NET dependency.
- Addressed several instances within the Splunk components in which deprecated functions and approaches were being used. Validated all updates against Splunk's AppInspect tool.

Notes:

- Supports upgrades from any prior release.
- Includes an installer for the latest compatible version of the Integration Middleware Engine, the appropriate SIEM Tool plugin, links to published documentation, and ancillary components (Splunk-specific packages only).

Checksums:

Middleware Engine + Plugin Package	SHA256 Sum
