

# BeyondInsight for Unix and Linux 9.1.1 Release Notes

October 31, 2019

## Issues Resolved:

- Resolved an issue with code editor initialization in appliance installations
- Resolved an issue where pbrun delegation did not provide the ability to choose run user
- Resolved an issue with profile script by removing absolute paths to binaries
- Resolved an issue with username validation rejecting valid characters
- Resolved an issue where single word hostnames would pass validation
