

# Privilege Management Cloud 21.8 Release Notes

December 14, 2021

## New Features and Enhancements:

- New Microsoft Sentinel SIEM Integration.
- Policy delivery improvements.
- Improved grid filtering
- Added new API calls for **Computers**:

API Call	Description
GET /Computers	Retrieve computer list
POST /Computers/RetrieveStatusInfo	Retrieve computer detail
POST /Computers/RetrieveLogs	Request computer logs
GET /Computers/{ID}/Logs	Get computer logs
GET /Computers/ComputerLog/{ID}/Content	Download computer log
GET /Computers/{ID}/CommandLogs	Get computer command logs
POST /Computers/Deactivate	Deactivate computer
DELETE /Computers/Delete	Delete computer
POST /Computers/Authorise	Authorize computer
POST /Computers/Reject	Reject computer
POST /Computers/{ID}/RenewCertificate	RenewCertificate computer

- Added new API calls for **Computer Groups**:

API Call	Description
GET /Groups	Retrieve group list
GET /Groups/{ID}	Retrieve group detail
POST /Groups	Create group
PUT /Groups	Update group
DELETE /Groups	Remove group
PUT /Groups/{ID}/Markasdefault	Group set default
PUT /Groups/{ID}/AssignComputers	Assign computers to group

API Call	Description
PUT /Groups/{ID}/AssignPolicyRevision	Assign policy revision to group
POST /Groups/{ID}/ClearPolicy	Clear policy from group

- PM Cloud Adapter
  - PM Cloud Windows Adapter now runs as LocalSystem by default.
  - Privilege Management for Windows can now query for Authorization Request Management updates on-demand.
- Web Policy Editor
  - TAP can now be enabled via the Web Policy Editor.
  - Users can now merge or overwrite existing policies with a template policy (Discovery, QuickStart for Mac, QuickStart for Windows, Server Roles, TAP High Flexibility and TAP High Security) within the **Utilities** menu of a policy. Users have the option to export an existing policy to XML before overwriting a policy to ensure the policy is not lost.
  - Password Safe integration within the Web Policy Editor enables customers to set Allow application and On-Demand Application Rules, allowing Password Safe users to help manage access to applications.

 **Note:** Customers require Password Safe to be installed and configured as a prerequisite to use this new feature.

**Components:**

- PM Reporting: 21.2.79
- Web Policy Editor: 21.8.259

**Compatibility:**

 **IMPORTANT!**

*Do not install a new adapter version before you are running a version of PM Cloud that supports it. Installing an unsupported adapter can result in endpoints that no longer connect. You will be notified before your instance of PM Cloud is upgraded.*

 **IMPORTANT!**

*If using the ServiceNow User Request Management (URM) feature, your instance of PM Cloud and all adapters must be updated to 21.8 or above before updating your endpoint agents to version 21.7. Using the newer agent with earlier versions of PM Cloud will cause request messages to become stuck in the Pending state.*

*Privilege Management for Windows 21.7 and Privilege Management Cloud 21.8 have enhanced the URM feature to be more user-friendly. Pending user request checks now happen whenever the requested application is run.*

*This affects only the PM Cloud and ServiceNow User Request Management (URM) feature specifically. If you are not using this feature, please disregard this warning.*

- PM MMC snap-in: **21.7.152 (Recommended)**, 21.6.153
- PM for Windows: **21.7.152 (Recommended)**, 21.6.153
- PM Windows adapter: **21.8.760 (Recommended)**, 21.7.622, 2.4.44585
- PM for macOS: **21.7.0.1 (Recommended)**, 21.6.0.153
- PM macOS adapter: **21.7.0.1 (Recommended)**, 21.6.0.153, 2.4.74915.0
- PM Rapid Deployment Tool for macOS: **21.7.0.3 (Recommended)**, 21.6.0.2

**Notes:**

- PM Cloud 21.8 supports upgrades from 21.7.622.
