

# Privilege Management Cloud 23.2 Release Notes

March 30, 2023

## New Features and Enhancements:

### Policy Editor

- Added the ability to configure what is presented on endpoints, based on the language set on their machine.
- Added the ability to configure reporting events and log file options for Windows Workstyles.

### Privilege Management Reporting

- Added the ability to report on events triggered using the **Keep Privileges - Enhanced** token via the **Events All** and **Process Detail** reports in Analytics v1.

### PM Cloud

- Analytics v2. Added the **Event Detail** view, which allows the user to see a detail screen for all process events.
- Analytics v2. Added functionality to allow the user to narrow their search as they type a minimum of three characters in the search filter bar of the **Events** grid.
- Added an **Activity** section to the **Configuration Settings** page to show the audit trail for system configuration settings.
- Added connection statuses to help users monitor PM Cloud connection issues (*Connected* and *Disconnected*). A computer status summary has also been added to the **Home** page.
- Disabled fields on the settings pages for users who have read-only permissions.
- Enhanced the computers list to allow users to filter out computers with duplicate host names.
- Added functionality to allow the user to see the process hierarchy for an event and the corresponding event details.
- Added a check so users can bypass the login page if they access a PM Cloud link after they have already logged in.

## Issues Resolved:

### Policy Editor

- Updated the Workstyle **Account** filter to allow account names containing a dot (for example, joe.bloggs) to be added.
- Updated styling and positioning of **Discard Changes** and **Continue Editing** buttons for consistency.
- Updated the default set with placeholder text reading *Select an Application Group* when editing an application.
- Added a save indicator when a user clicks **Save and Unlock** when saving a policy.
- Updated Password Safe integration settings to ignore validation errors once the **Activation Settings** are disabled.

## Privilege Management Reporting

- Updated date and time format to be reflective of a user's preference in event data.
- Enhanced host list to show the full host name regardless of the host name length.

## Privilege Management Cloud

- Resolved an issue with the EULA not showing up on user creation and sign-in.
- Analytics v2. Prevented any events with dates in the future from displaying in the **Events** grid.
- Updated the **System Directory** and **System Drive** values to display in the correct fields on computer details.
- Analytics v2. Enhanced the **Events** grid so that column widths are retained when the user leaves the grid and returns.

## PM Cloud Windows Adapter

- Reduced the number of **ReceiveStatusInfo** commands that are submitted to the command processor.

## Components:

- PM Reporting: 23.1.67
- Web Policy Editor: 23.2.136
- PM Reporting UI: 23.2.227
- Event Collector: 23.2.22
- PM Cloud: 23.2.514

## Requirements
