

Privilege Management for Mac 23.3 Release Notes

April 20, 2023

New Features and Enhancements:

- Improved policy handling in PM Cloud, which means policies now update approximately every 5 minutes.
- Introduced the **acr_value** functionality to multi-factor authentication IDP messages. This allows users to change the behavior of the 2FA request.
- Introduced the ability to audit the policy name and revision number applied to the endpoint connected to Privilege Management Cloud.
- Introduced caching functionality to store repeated user actions, which improves Privilege Management for Mac performance.
- Improved smart card deployment with support for **NotEnforcedGroup**, which excludes users within that group from requiring smart card authorization when smart cards are enforced.

Issues Resolved:

- Enhanced the capture config tool to now capture the Password Safe clients **settings_app.xml** file.
- Resolved an issue with **Refresh all policies** status remaining greyed out after a policy refresh for endpoints connected to Privilege Management Cloud. **Refresh all policies** is now active after 15 seconds.
- Resolved an issue that caused Esko packages to be handled incorrectly.
- Resolved an issue in which the wrong license was being used from the policy when Windows TAP was included in the policy.
- Resolved an issue in which Privilege Management Cloud Adapter reported macOS Ventura as *Unknown OS* on the Privilege Management Cloud portal. Now reports as *macOS Ventura*.
- Resolved an issue with 365 Defender not interrogating Privilege Management for Mac.
- Resolved an issue with the rule name field for events not populating in BeyondInsight.

Compatibility:

- Privilege Management Policy Editor 23.3
- Privilege Management ePO Extension 22.7
- Privilege Management Cloud Adapter 23.3
- BeyondInsight Adapter 23.3
- BeyondInsight 22.4
- McAfee Trellix Agent 5.7

Note: If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.

Supported Operating Systems:

- macOS 13 Ventura
- macOS 12 Monterey
- macOS 11 Big Sur
