

Privilege Management for Mac 23.7 Release Notes

August 29, 2023

Requirements:

- Trellix (formerly McAfee) Agent (required if you are installing the Privilege Management client with Trellix)

New Features and Enhancements:

- Introduced Program Name, Application Path, Product Version, Publisher and Command Line parameters to the Mac messages.
- Improved the caching feature in Privilege Management for Mac by caching AuthOpen macOS events.
- Improved how Privilege Management for Mac handles events sent to PMC by ensuring events are sent to PMC in a timely manner (within 60 seconds).
- Introduced a new tool to aid in the diagnostics of Privilege Management for Mac.
- Improved the multifactor authentication messaging within Privilege Management for Mac to include the ability to configure *Always auth* via Azure Active directory and suppress multiple multifactor authentication messages from being shown.

Issues Resolved:

- Resolved an issue which caused Privilege Management for Mac dialogs to reject valid user credentials when used with JumpCloud due to a conflict with the libpam API.
- Resolved an issue when using **sudo -u** or **-g** command referencing UID or GID respectively would error and not complete.
- Resolved an issue where our component could fail when attempting to install packages with Homebrew like ansible.
- Resolved an issue where Privilege Management for Mac would display an invalid challenge code with specifically created bundles like macOS InstantView.app.

Known Issues:

Using **Run with Privilege Management** for the Console.app in macOS will not work. This is due to changes with macOS which we've raised with Apple with a Feedback assistant ticket FB9739423. We are investigating potential solutions.

Compatibility:

- Privilege Management Policy Editor 23.7
- Privilege Management ePO Extension 22.7
- Privilege Management Console Adapter 23.7
- BeyondInsight/Password Safe 23.1
- Trellix Agent 5.7

Note: *If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.*

Supported Operating Systems:

- macOS 13 Ventura
- macOS 12 Monterey
- macOS 11 Big Sur

i For more information about compatibility, please see [Privilege Management for Windows and Mac: Supported Versions and Operating System Compatibility](https://beyondtrustcorp.service-now.com/csm?id=kb_article_view&sysparm_article=KB0017101) at https://beyondtrustcorp.service-now.com/csm?id=kb_article_view&sysparm_article=KB0017101.

Notes:

None.
