

# Privilege Management for Mac 23.9 Release Notes

October 31, 2023

## Requirements:

- Trellix (formerly McAfee) Agent (required if you are installing the Privilege Management client with Trellix)

## New Features and Enhancements:

- Updated product icons to reflect new company wide product branding.

## Issues Resolved:

- Resolved an issue which caused Privilege Management for Mac dialogs to reject valid user credentials when used with JumpCloud due to a conflict with the libpam API.
- Resolved an issue where applications were requesting *NULL* authorization requests which caused Privilege Management for Mac to display two dialogs when only one should be shown in **System Settings**.
- Resolved an issue with the LucidLink application not launching with Privilege Management for Mac installed and valid policy in place.
- Resolved an issue when our component cannot correctly take control of the authorization database because of a custom password policy with a maximum password limit of 16.
- Resolved an issue with not being able to run **locate.updatedb** on macOS Ventura 13.3.1.

## Known Issues:

Using **Run with Privilege Management** for the Console.app in macOS will not work. This is due to changes with macOS which we've raised with Apple with a Feedback assistant ticket FB9739423. We are investigating potential solutions.

## Compatibility:

- Privilege Management Policy Editor 23.9
- Privilege Management ePO Extension 22.7
- Privilege Management Console Adapter 23.9
- BeyondInsight/Password Safe 23.2
- Trellix Agent 5.7

**Note:** If you have a business requirement to downgrade the Mac client, please first uninstall the currently installed version.

## Supported Operating Systems:

- macOS 14 Sonoma
- macOS 13 Ventura

- macOS 12 Monterey
