

Privilege Management Console 2.4 SR2 Release Notes

October 20, 2020

New Features and Enhancements:

- The Windows Adapter can now be run under Windows FIPS Compliance mode.

Note: *The above feature applies only to the Windows PMC Adapter.*

- Removed underscore restrictions on computer hostnames.
- Integrated Privilege Management Reporting 5.7.

Issues Resolved:

- Resolved issue where the Privilege Management Client version was not accurately reported in PMC.
- Resolved issue where the Privilege Management Adapter version was not accurately reported in PMC.
- Resolved issue where changing the hostname of a computer was not reflected in PMC on the next adapter check-in.

Note: *The above issues resolved apply only to the Windows PMC Adapter.*
