

# Endpoint Privilege Management Reporting 24.1 Release Notes

February 27, 2024

## Issues Resolved:

- Removed Event Parser dependency on SQL Native Client 11, which is end of life. The Event Parser required SQL Native Client 11 to establish a connection with the database. Updated to now use OLE DB Driver for SQL Server.
- Updated the PMR installer to detect if the Microsoft OLE DB Driver v19.x is installed. If not detected, then the driver will be installed before proceeding with the PMR installation.
- Resolved an issue with installing Privilege Management reporting on SQL Server 2022. Replaced the database dependency on SQL Native Client 11 with OLE DB Driver for SQL Server.
- Resolved an issue with incorrect data displayed when accessing report information through **Events All > Event Details**.
- Resolved an issue with the **Process Hierarchy** details displaying the incorrect parent process. This was seen on the **Event Details** page.
- Resolved an issue with events being lost when a fail event occurred (for example, a full transaction log could cause a failure and events would be lost).

## EPM Components

- PM Reporting Database: 24.1.49
  - Event Parser: 24.1.49
  - Privilege Management Reporting Pack 24.1.49

## Supported Operating Systems:

- Event Collector
  - Windows Server 2016
  - Windows Server 2019
  - Windows Server 2022
- Database
  - SQL Server 2014 Standard or Enterprise
  - SQL Server 2016 Standard or Enterprise
  - SQL Server 2017 Standard or Enterprise
  - SQL Server 2019 Standard or Enterprise
  - SQL Server 2022 Standard or Enterprise
  - Microsoft Azure SQL Server
- SQL Server Reporting Services (SSRS)
  - SSRS 2014 Standard or Enterprise
  - SSRS 2016 Standard or Enterprise
  - SSRS 2017 Standard or Enterprise

- SSRS 2019 Standard or Enterprise
- SSRS 2022 Standard or Enterprise
