

Privilege Management Reporting 5.7 SR1 Release Notes

October 13, 2020

New Features and Enhancements:

- Authorization Source field is now available to support the Privilege Management for Windows and Password Safe integration from **Events>All** and **Event Details Report**.
- The purge tool has been replaced by scripts and is integrated into staging to avoid conflicts. Additionally, statistics information is now logged to the **ProcedureExecutionLog** table.
- Good events are now processed without user intervention. Previously, a batch containing good events and problematic events was not processed.

Issues Resolved:

- Resolved an issue involving the handling of applications with special characters or symbols. Previously, this issue caused staging errors that resulted in bad event batches.
- Resolved an issue with the installer not showing the correct script it was executing. Upgrade instructions have been clarified to indicate that **CopyFromStaging** must not be running to prevent upgrades from stalling.

Known Issues:

- When performing an upgrade of the Privilege Management Reporting Event Parser, the user may receive a message in the Event Viewer Application log stating that the BeyondTrust Privilege Management Event Parser service could not be restarted. This service can be manually restarted in **services.msc**.
- When upgrading the Privilege Management Reporting Database, the user may receive a message stating that there are insufficient privileges to proceed. This can be bypassed by using **Run as Administrator** for the Privilege Management Reporting Database installer.

Supported Operating Systems:

- Event Collector
 - Windows Server 2012
 - Windows Server 2012 R2
 - Windows Server 2016
- Database
 - SQL Server 2012 Standard or Enterprise
 - SQL Server 2014 Standard or Enterprise
 - SQL Server 2016 Standard or Enterprise
 - SQL Server 2017 Standard or Enterprise
 - Microsoft Azure SQL Server
- SQL Server Reporting Services (SSRS)
 - SSRS 2012 Standard or Enterprise
 - SSRS 2014 Standard or Enterprise
 - SSRS 2016 Standard or Enterprise
 - SSRS 2017 Standard or Enterprise
