RELEASE NOTES

Privilege Management for Windows 23.1.269 Release Notes

April 13, 2023

Requirements:

- Microsoft .NET Framework 4.0 (required to use Activity Viewer, Power Rules, PowerShell audit scripts, and PowerShell API)
- Microsoft .NET Framework 4.6.2 (required to use Agent Protection)
- Microsoft .NET Framework 4.8 (required to use Multifactor Authentication with an OIDC provider)
- PowerShell 3.0 (required to use Power Rules, PowerShell audit scripts, and PowerShell API)
- Microsoft SQL Server Compact 4.0 (required on the endpoint that will run the Activity Viewer console)
- Trellix (formerly McAfee) Agent (required if you are installing the Privilege Management client with switch EPOMODE=1)

Note: The executable version of the client package includes all necessary prerequisites (excluding .NET Framework) and automatically installs them as necessary. If you use the MSI or ZIP package, you must manually install any necessary prerequisites.

Issues Resolved:

Resolved an issue that could cause a crash of the Defendpoint Service when accessing the tray menu on Windows 1607/1809
versions.

Compatibility:

- Privilege Management Policy Editor 23.1 (recommended), 21.2+
- Privilege Management ePO Extension 22.7 (recommended), 21.1+
- Privilege Management Console Windows Adapter 23.1 (recommended), 21.6
- BeyondInsight/Password Safe 22.4 (recommended), 7.2
- Trellix Agent 5.7
- Trellix ePO Server 5.10 Update 13

Supported Operating Systems:

- Windows 11
 - o 22H2
 - o 21H2
- Windows 10

Notes:

As of 23.1, we will no longer be supporting the Activity Viewer application that came bundled with previous versions of Privilege
Management for Windows. As we continue to add features to the product, we have identified a need to explore alternative options
for how we can provide the functionality of Activity Viewer in a modern way that works across our solution, and this will be included
in a future release of Privilege Management.
