

Android Access Console 2.2.9 Release Notes

July 14, 2020

New Features and Enhancements:

- Added MDM support.
- Android 7.0 or greater is now required to run the Android access console.
- Moved the Keyboard button on the **Screen Sharing** view so it doesn't get hidden in the overflow menu.

Issues Resolved:

- Resolved an issue in which the **Last Accessed** date did not display correctly after first being pinned from the Android access console.

Notes:

- BeyondTrust Android access console 2.2.9 utilizes ThinClient Protocol 2.2.
- BeyondTrust Android access console 2.2.9 is compatible with 18.1+.
