

Privileged Access 16.1.4 Release Notes

December 20, 2016

Requirements:

- This version of Bomgar has been certified for the physical Bomgar Appliance (B300P), virtual Bomgar Appliances (VMware & Hyper-V), and cloud deployment models.
- This release requires Base software 4.4.1 or later.

Issues Resolved:

Access Console

- Resolved an issue with the access console sometimes hanging after being presented with a credential window on Windows 10.

Reporting

- Resolved an issue with screen sharing recordings showing only up to until the first stop of screen sharing if screen sharing was stopped and started.
- Resolved an issue with session recordings taking up extra space and being converted slowly.

Shell Jump

- Resolved an issue with transferring a file through Shell Jump causing some data corruption.

Notes:

- Supports upgrades from PAM 16.1.1+. If on a version prior to this, multiple upgrades will be required.
- Requires API version 1.15.1.
- Requires Integration Client 1.6.2.
- Requires Endpoint Credential Manager 1.1.0.
- Certified with the following Bomgar Mobile versions:
 - iOS Access Console 2.2.2+
 - Android Access Console 2.2.3+
 - Android Unattended Access Client 2.2.0+
 - NOTE: The above mobile apps require trusted CA-signed certificates on the appliance.
