

## Privileged Access 18.1.3 Release Notes

April 10, 2018

### Requirements:

- This version of Bomgar has been certified for physical Bomgar Appliances (B200, B300 & B400), virtual Bomgar Appliances (Azure, VMWare & Hyper-V), and cloud deployment models.
- This release requires Base software 5.2.0 or later.

### New Features:

- Localized software is available for the 18.1.3 release.
  - Dutch
  - French
  - German
  - Italian
  - Japanese

### Issues Resolved:

- Resolved an issue with RDP Jump Items not properly connecting to Windows 8 and above systems running the latest Windows updates.
- Resolved an issue with the customer client chat window scrolling to the top every time a new chat message was entered.
- Resolved an issue with pressing Enter in an RDP session would inject as if pressing Enter from the numeric keypad.
- Resolved an issue with anonymized users being exposed after creating another user with the same username.
- Resolved an issue with the access console showing a large number of Jump Clients as offline.
- Resolved an issue with local pushes and starts failing for non-domain users.

### Known Issues:

- None.

### Notes:

- Supports upgrades from 16.1.5+. If on a version prior to this, multiple upgrades will be required.
- Requires API version 1.16.0.
- Requires Integration Client 1.6.3.
- Requires Endpoint Credential Manager 1.2.2.
- This release is certified with the following Bomgar Mobile versions:
  - [iOS Access Console 2.2.3](#)
  - [Android Access Console 2.2.4](#)
