

## Android Rep Console 2.2.2 Release Notes

January 14, 2014

### New Features and Enhancements:

- The Android Representative Console now supports challenge/response authentication, such as RSA.
- The Android Representative Console now supports the Privacy Screen feature.

### Issues Resolved:

- Resolved an issue with no error message being displayed when a hostname with an invalid port number is used.
- Resolved an issue with saving credentials when switching between sites that allow or disallow saving of credentials.
- Resolved an issue with closing the app while a Session Assignment notification was being displayed.
- Resolved an issue where the app would sometimes close when generating Session Keys.
- Resolved an issue with the missing trademark symbol on the prompt for removing Bomgar Buttons.

### Requirements:

- Bomgar Representative Console for Android 2.2.2 runs on Android 2.3, 3.x, and 4.x.
- Bomgar Representative Console for Android 2.2.2 is compatible with 12.1.1+.

### Notes:

- Bomgar Representative Console for Android 2.2.2 is available for download via Google Play.
