

Base 3.2.4 Release Notes

March 17, 2011

A new version of Bomgar's Base software is now available. This maintenance release includes a few important issue resolutions as noted below. This update also includes all of the new functionality recently added in Base 3.2.2.

Requirements:

- Base version 3.2.4 has been certified for all physical appliances (B100, B200, B300 & B400)
- Your appliance must currently be running Base 3.1.8 with Service Patch 8 or higher before upgrading to 3.2.4

Issues Resolved:

- Resolved an issue where an error message could be displayed after 30 seconds when rebooting the appliance with the Internet Explorer browser
- The time zone now reverts to "UTC" when the appliance is restored to factory defaults
