

Base 4.4.2 Release Notes

December 6, 2016

New Features and Enhancements:

- Base 4.4.2 now supports syslog over TLS for sending messages to a remote syslog server.

Issues Resolved:

- Resolved an issue with the real time API not sending a notification when the Restart Bomgar Software button was pressed.
- Resolved an issue with session recordings being saved to the wrong partition.
- Check for Updates now shows "No updates available" instead of "You are running the latest version of Bomgar."

Notes:

- Base 4.4.2 requires Base 4.2.2 or later for upgrades for all deployment models except Bomgar Connect.
