

Endpoint Credential Manager 1.2.0 Release Notes

May 9, 2017

New Features and Enhancements:

- Added support for SQL Server Management Studio injection.
- Added support for OAuth authentication.
- Updated ECM Protocol 1.3.

Issues Resolved:

- Resolved an issue with the ECM losing its configuration after an upgrade.
- Resolved an issue with the ECM service not responding when unable to authenticate.

Notes:

- This version is compatible with PA 17.1.1+.
