

BeyondTrust Appliance U-Series Software 3.5 Release Notes

June 14, 2022

New Features and Enhancements:

- Users can now use SSO to authenticate from BeyondInsight into Appliance application.
- Added an **Appliance > Shell** page, to display a **Welcome Screen** when there is a new release.
- **Date & Time Synchronization** features have been moved to the **Appliance > Enterprise Integrations** page.
- **Product Serial Numbers** have been moved to the **Appliance > Software & Licensing** page.
- **Software Versions** have been moved to the **Appliance > Software & Licensing** page.
- **Email** features have been moved to the **Enterprise Integrations** page.
- **Health Event Forwarding** has been moved to the **Enterprise Integrations** page.
- **Appliance API Keys** has been moved to the **Enterprise Integrations** page.
- **Log File Export** has been moved to the **Enterprise Integrations** page.
- The ability to change the BeyondInsight admin password is now limited to the BeyondInsight Administrator user.
- Added Legacy App menu item to Appliance application.
- Added certificate authority cert to the API key exchange blob.
- Implemented generic error handling to display a better looking error page.
- Updated Retina warning banner to indicate Retina scanners are no longer supported.

Issues Resolved:

- Resolved issue in which the PBW-API service failed to activate the PBW policy when the Appliance was configured.

Notes:

- This update is available via the BT Updater or as a manual installer from the download tool.
- .NET Core 3.1.22 or later and is required (available through BT Updater).
- .NET 6.0.4 or later is required (available through BT Updater).
- The Deployment and Configuration Wizard is dependent on BeyondInsight 21.2.
