

BeyondTrust Appliance U-Series Software 4.0 Release Notes

October 25, 2022

New Features and Enhancements:

- Central management of SUPI updates across multiple Appliances.
- Updated **Software Versions** grid.
- Updated **API Keys** grid.
- Now supports AWS RDS when creating a database.
- Removed wipe appliance option.
- Removed legacy calls for App Bus and Central Policy.
- Deprecated support for the discovery tool.
- Added date, time, and timezone to the blue Appliance header.
- Disabled the ability to change BeyondInsight password if the version installed is earlier than 21.1.
- Removed dark mode colors.

Issues Resolved:

- Resolved issue which caused the pre-logon banner to be bypassed.
- Resolved issue in which 2012 Appliances that did not have WebSockets enabled did not display a message stating so.
- Resolved issue that was triggering High Availability because BeyondInsight services were not shutting down in a timely manner.

Notes:

- This update is available via the BT Updater or as a manual installer from the download tool.
- .NET Core 3.1.22 or later and is required (available through BT Updater).
- .NET 6.0.4 or later is required (available through BT Updater).
- The Deployment and Configuration Wizard is dependent on BeyondInsight 21.2.
