

Security Package Update Installer 3.0.2 Release Notes

October 15, 2020

Issues Resolved:

- Resolved issue in which two non-cumulative packages failed to install together.

Known Issues:

- SUPI Service API allows creating duplicate schedules, which breaks processing (not UI).

Notes:

- This release will not install to Server 2008 UVMs.
- When installed on a Server 2012 UVM, the following new Subscriptions are added with the install:
 - UVM Supporting Software
 - UVM Environment
 - Security patches for SQL 2014
- When installed on a Server 2016 UVM, the following new Subscriptions are added with the install:
 - UVM Supporting Software
 - UVM Environment
 - Security patches for SQL 2016
- The desktop **SUPI.EXE** no longer has a user interface but can still be used at the command prompt to support scripting.
- This installer is a prerequisite to installing UVM Software 3.2.2.
