

Security Package Update Installer 3.2.0 Release Notes

October 18, 2022

New Features and Enhancements:

- Multi-Appliance SUPI support.
- Upgraded SUPI service from .NET 3.1 to .NET 6.

Issues Resolved:

- Resolved issue in which SUPI Service API allowed creation of duplicate schedules, which broke processing (not the UI).
- SUPI packages designed for 2012 OS that are downloaded on 2016 are no longer imported to the SUPI database.

Notes:

- This update is available as an automatic update over BT Updater.
- The desktop **SUPI.EXE** no longer has a user interface, but can still be used at the command prompt to support scripting.
- SUPI 3.2.0 is a prerequisite to installing UVM Software 4.0.0 and later.
